- **IDE:** Sublime Text, PyCharm, VS Code
- **Other Softwares**: MS Office, Powerpoint, Postman
- **Operating System:** Windows

CERTIFICATIONS

- Full Stack Web Development in Python/React from MashupStack

PROJECTS

MEDICAL STORE APPLICATION (ReactJS,Django,Javascript ,Python,MySQL ,HTML, SASS)

This project involved creating an application using React and Django framework to manage a medical store. It involves functions such as medicine management where the user can add and update medicines. They can also list, view and delete the necessary medicines. They can also search for medicines to check if it is available. These functions

are available to legitimate users upon successful authentication. This project uses ReactJs to create a UI which consumes REST APIs created using Django.
 Git repo

Agropedia (HTML, Js, css , php ,sql,mysql)
Agropedia is a website for online agricultural trade. This website helps farmers by providing them a large market online to sell their product. They can also hire farm laborers and be updated with the recent agricultural developments. The wholesalers and the retailers are also benefited as they can buy from a larger market

Portfolio Website (Bootstrap, CSS, HTML, Git, Github Pages,React)
This project is my portfolio website built using a bootstrap theme. It showcases my skills and projects. It was hosted using github pages.

MINOR PROJECT

Sorting Visualiser (Javascript , Html, CSS)
Developed an interactive web application that allows users to visualize sorting algorithms like bubble sort, quicksort, and merge sort, enhancing their understanding of fundamental computer science concepts.
Utilized algorithmic thinking to implement various sorting algorithms efficiently, demonstrating a deep understanding of algorithm complexity and optimization.
